very bones +++

# WHO WE ARE

This project is about three dudes which watched way too much jackass and sniffed too much glue in the 6th grade while art classes. Nethertheless all three of us are still alive and hyped as fuck playing in a band together. It took us quite a while to find each though we knew each other for most of our lifes (probably because of the glue...)

Anyway, we could write 3 fking pages about how cool we are and how awesome our music is, but that\*s quite not our mentality. We convince with performance.
